

EUROSUNMED 2nd International School on Photovoltaics, Concentrated Solar Power, Storage, Grid Integration and the Economics of Renewable Energy, 28 – 31 March 2015, Sharm el-Sheikh, Egypt

One year after the success of the 1st International School and workshop in Rabat (Morocco), the **EUROSUNMED** project, supported by the FP7 Programme of the European Commission, is happy to organize a 2nd *International School on Photovoltaics, Concentrated Solar Power, Storage, Grid Integration and the Economics of Renewable Energy* from 28 to 31 March 2015 in Sharm El-Sheikh (Egypt).

The call for the events closed by the end of January and more than 280 applications were received. The organizers hope to welcome 150 students, researchers and professors working in the area of renewable energies in the MENA, EU and beyond.

The event will consist of four days with numerous sessions for early-stage and experienced researchers, that cover a variety of topics from photovoltaics, concentrated solar power, electrical & thermal storage systems to connecting electrical grid. The event will end with a session dedicated to Economics of Renewable Energies / Energy efficiency & sustainability, with a special attention to topics of interest for students, such as possibilities on the current job market. All lectures will be delivered in English.
