

Eurosunmed presented at the H2020 Launch event in Cairo

The European Commission's DG Research and Innovation organised in February 9, 2014 a regional Conference in Cairo, Egypt to promote and present Horizon 2020, the new collaborative transnational research programme after the 7th framework programme. This conference aimed at discussing the future of international cooperation in Research and Innovation in the EuroMed region and draw the attention of stakeholders in EuroMed countries to the opportunities and challenges for MPCs in Horizon 2020 as well as promote the programme to R&I stakeholders in the region.

One of the Egyptian project's partner, Tamer Abdelrehim from Nile Valley Engineering (NVE) was there, representing the Eurosunmed project, launched under the 7th framework programme .

Horizon 2020 will offer many opportunities for addressing EuroMed Common Challenges through R&I international cooperation.
