

Launch of the EUROSUNMED project 4 September 2013

Eurosunmed is a scientific research project supported by the FP7 Programme of the European Union (FP7-ENERGY-2013-608593) devoted to the development of new technologies in 3 energy field areas: photovoltaics (PV), concentrated solar power (CSP) and grid integration (GI), bringing together a consortium of 17 partners from Europe and Mediterranean Partner Countries (MPC).

The Kick-off meeting of EUROSUNMED took place on 4 September 2013 at the European Commission, CDMA, 21 rue du Champ de Mars, Brussels, Belgium, at 09:00-18:30. All 17 partners of the consortium were represented and there were altogether 33 participants. The meeting agenda consisted of presentations by the Project Coordinator, the Project Officer and the partners. In addition, group discussions were organized among the different Workpackages. The goal of the kick-off meeting was to officially launch the project, to allow for the partners to meet and to define the immediate next steps in the advancement of the project.
